Fred Jones has been out of work, for a 3 or 4 months, with liver problems. He had been at Southeast Medical Center but was sent to UAB in B'ham this past Wednesday, the 2nd of Feb. That same day (very unexpected) they told him they had a liver donor and set him up for transplant yesterday, the 3rd. Except for a few minor complications he is holding his own and will be in ICU a couple of weeks. I am not related to Fred but he's a friend and co-worker. Our thoughts and prayers are with him and his family and I thought you might want to post.

Fred Jones is out of Intensive Care and in a room. Looks like he's doing very well considering what he's gone through. Let's keep him in our thoughts and prayers!

February 14, 2011 Fred's been moved to an Apt. on UAB Campus. He is recovering very well.
